Red Book – Communist Line Today (2025)
By Alain Badiou

I. Mass Line in India, Inter-tanglement proven with Israel and Arab Intifada producing Arab Socialism, Black power in Algeria, America and Cuba with Chinese mass line in practice with Mao Zedong and Shomit Sirohi as leader – confirmed by Quantoff and Deterior capitalism with Proof in All Works

In fact the Red Book is a development of the line in India as in fact what I call mass line and Party Line which is with a Permanent Revolution leader as Leninist Professional Revolutionary who then completes his term as leader in pure dictatorship and relieves to amorous processes which then is near – and rejects with American liberals the role as militant advisor of Arab intifadas and is now in fact freeing up the whole field of debates created in the Great Period of Mao and Sirohi with Fidel and Che, even FLN and Israel to in fact the confirmation of One Axiomatic Red Book produced –

Style is common genius in our period – Red Book re-iterates that science is higher progress and in fact exact and real – science is lived and even innovations are great – imagine that the whole argument summarises – science is in fact a real thing.

II. Red Book – what does it mean?

Red Book means – principles to live by – even What is to be Done in a simpler educated format – and even Sirohian philosophy in simpler Chinese character and inspiration in education from Yunan period to Je-nan.

III. Today – German Idealism and Heidegger – an Eventful Discussion as Always – exploring its meaning with Mao's simple piece in 1927

In fact Sirohi dictates that Heidegger argues for a preliminary and simple being-in-the-world phenomenology guided by Language in German which he teaches to us all and effectively produces the thesis – "Geological scopes is better understood in linguistic or scientific format" – he then produces a chart of events – and includes mathematics from Cantor to present developments in surreal number theory as concluding that sets are simple periods in Du Bois' argument in World and Africa, that Africa proves it – with a cinematic rendition of Soviet analysis of physics and cinema which also means that Idealism is correct and materialism is scientific – live in cinematic meanings of Du Bois' other argument – a

geological scope is lived cinematically – proof in fact of an Event – eternal life in Red Book senses actually.

IV. Red Book again – thanking Mao

In fact the Red Book is a simple Chinese work which summarises in beautiful ways I said in 1968 – 72 – the active sense of politics and engagements even love and art – which then I call Being and Event these days published again by Sirohi recently – I agree in fact that it is a mathematical orientation on the Red Book days – that in fact one can live by mathematical formalization in Mao – that he is in fact in praxis what Cohen is in mathematics – it is though a simple dictum – mass line is active, lives are lived. And days are historical.

Thank you.
